DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS papers filed 8/4/1999 and 2/21/2001 have been received and placed in the record of file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by the Applicant's Admitted Prior Art (pages 1-4 of the present specification).

As per independent claim 1, the AAPA discloses a method and system for achieving 3-D effect using the relation map function (page 2, lines 21-22) comprising a step of determining a

Art Unit: 2671

directional relation corresponding to the pixels, wherein the directional relation defines relations between the pixels and edges of the 2-D graphic object (page 2, lines 22-29), a step of generating Z-axis parameters corresponding to the pixels in response to the directional relation with an effect function, wherein the effect function renders the Z-axis parameters responsive to a relation limit varied with directions of the directional relation (page 2, line 29 through page 3, line 8), and a step of rendering the 3-D graphic object in response to the 2-D graphic object and the Z-axis parameters (page 3, lines 3-8).

As per dependent claim 2, the AAPA further inherently discloses wherein each of the pixels comprises red, blue, green and alpha channel data.

As per dependent claim 3, the AAPA further discloses wherein each of the directional relation defines relative edge positions of the 2-D graphic object closet to the pixels (page 2, lines 25-32).

Due to the similarity of claims 4-9 to claims 1-3, they are rejected under a similar rationale.
